# E- Auction Group K

Step 1 - While Deploying the contract we define the bidding time and the address of the auctioneer

The Contract is deployed

Functions

Step 2 - The seller registers himself on the platform.

Step 3 - The bidders registers himself. The auctioneer verifies the bidders using their respective addresses.

Step 4 - The auctioneer starts the auction.The bidders are required to bid alternatively.

Step 5 - The bidders can now start bidding.The current bid should be higher than the previous bid and the bidder who made the previous bid gets his money refunded to their account.

Step 6 - This is continued till the auction is completed. The auctioneer also has the authority to end the auction before the designated time.
